

Product name	AC1-U (BLUE BOOM)
This is the control card used in both the standard and the high speed ACCESS BLUE traffic barriers.	
Input voltage	220Vac 50Hz single phase +/-10%.
On board fuse protection	220Vac input circuit.
On board surge protection	Yes (MOV)
Motor output	220Vac ≤900W single phase, induction forward and reverse motor output.
Limit switch inputs	Yes, for both open and closed position.
Safety switch input	Yes. Normally closed switch circuit.
Button trigger input	Yes.
Auxiliary supply output	12Vdc @ 160mA peak.
Status LED output	Yes.
Operating mode options	<ul style="list-style-type: none"> • Simplex mode – Push to open/push to close. • Complex mode – Push to open. Variable time automatic closing. <p>Click on mode for full description.</p>
